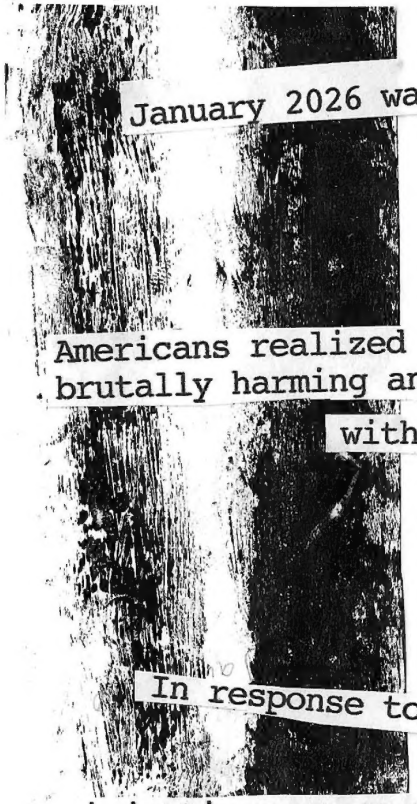
PRINTMAKERS ON THE FRONTLINES



January 2026 was a wake up call to everyone.

Americans realized that ICE agents were brutally harming and kidnapping people without any repercussions.

In response to these daily injustices, communities began to

ORGANIZE

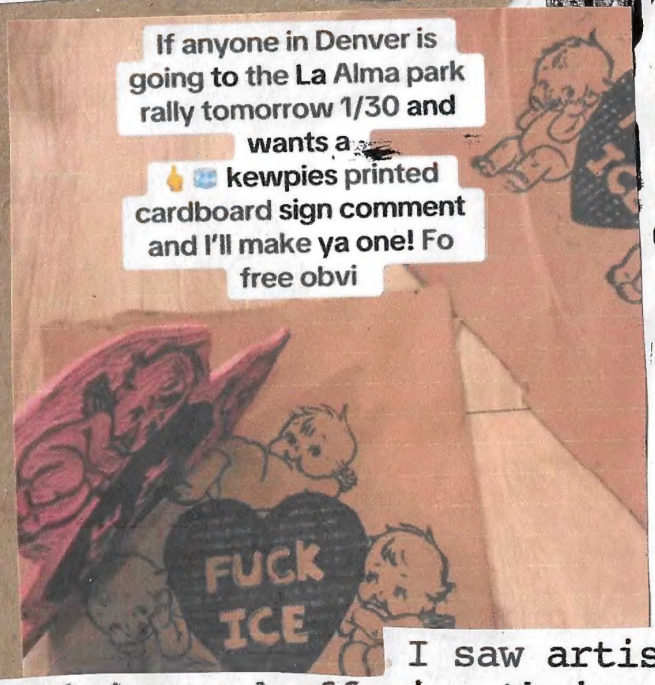
Students walked out of schools,

workers refused to work,

and the community supported each other any way they could.

At protests people held signs and flags. Artists came out to provide signs.

On my instagram account that I use for art,



If anyone in Denver is going to the La Alma park rally tomorrow 1/30 and wants a 👍🏼 kewpies printed cardboard sign comment and I'll make ya one! Fo free obvi
FUCK ICE

I saw artists organizing and offering their services to help activists protest.

↑ a literal BBQ get together with local bands

I think its beautiful when art and community overlap especially during hard times. It reminds us that we are not alone. Accesability is also extremly important during these community events. I chose artists and shops that showed those values. I hope this zine can be a ~~reminder~~ reminder to people in the future that we are not alone and how community is super important to the revolution.

It's important to keep record of these things because ~~America~~ America Loves to rewrite history and censor parts that make it look bad.

Here's to zines AND the revolution ♡!
